Monode DI (Die-Impression) Flat Stencils

Packaged 100 stencils per box in two Popular sizes.

- Catalog No. DI 27 2 1/2" x 7"
- Catalog No. DI 37 3 3/4" x 7"

Monode DI Roll Stencils

Available in three popular widths 1 1/2", 2 1/2", and 3 3/4", from stock. Special sizes made to your order.

Custom Die-Impressing

MONODE will die-impress stencils with your trade-mark or other repetitive data on roll or flat stencils, spaced at convenient increments, to enable you to add (with typewriter or Monode Stencil Cutting Typewriter) extra information, such as part number, heat treat code, sizes, etc., As needed

See instructions for ordering special stencils.

Catalog Numbers

Length of roll	1 1/2" wide	2 1/2" wide	3 3/4" wide
20 feet	DI 120	DI 220	DI 320
100 feet	DI 1100	DI 2100	DI 3100
200 feet	DI 1200	DI 2200	DI 3200
300 feet	DI 1300	DI 2300	DI 3300
600 feet	DI 1600	DI 2600	DI 3600

Tractor fed paper

For use on computer printers. Dot-matrix or daisy wheel. 2 1/2" wide or 3 3/4" wide. 20' to 600' long.

HOW TO ORDER CUSTOM MADE STENCILS

Observance of the requirements shown on this check list will expedite delivery of stencils which you can use in production as soon as received. Beautifully made stencils, promptly delivered, do NOT make friends if some significant detail is overlooked.

Available Marking Area - Send drawing or sketch with dimensions. If mark is on radius, show both I.D. And O.D. Of marking area. MAKE ALLOWANCES for bevels, chamfers, radii, etc., Which limit the marking area. Double-check references to Diameter vs. Radius. If pitch diameter or pitch radius is shown, be certain that character height allows space above and below legend.

Position of Mark in this Area. Indicate on above sketch if mark is to be centrally located, or nearer O.D. Or nearer I.D. Also indicate limitation such as spacing of bolt-holes, shoulders or other interferences.

Over-All Size of Mark. Distinguish between marking area, and size of mark.

Style and Height of Each Line of lettering, figures, etc., With desired SPACE BETWEEN LINES.

Exact Legend - Paying particular attention to commas, dash, extra space, periods or no periods in legends like U.S.A., USA, PSI, etc. DO NOT USE QUOTATION MARKS, or PARENTHESES in legend sketch, UNLESS YOU WANT THEM TO APPEAR IN THE LEGEND.

Indicate on Sketch the Direction of Legend with relation to length of stencil as well as LOCATION of LEGEND. (On Die-impression stencils, will additional material be typed AFTER the mark or under the mark?)

Number of Times Mark is to Appear on Stencil. (Allow room for masking between marks. It is poor economy to place marks so close that only every second mark may be used.) When several marks are to appear on a single stencil show desired location of marks on sketch.

Approximate vs. Exact Spacing between marks. Unless specifically requested, duplicate marks on flat stencils, and spacing between marks on roll stencils, will be plus or minus 1/4". IF JIGS or FIXTURES are used to mark SEVERAL PARTS AT ONE TIME, it will be necessary to PREPARE ART WORK to EXACTLY FIT the fixture. Pairs, trios or sets of 4 will then be placed on stencils at reasonable spaced intervals. SEND SKETCH WITH DIMENSIONS of proposed or prevailing fixtures.

When Rush Instructions are Given Verbally - and time is not allowed for submitting proofs, we will make every effort to supply proper stencils - but REPLACEMENT Stencils for incorrectly interpreted stencils will be invoiced as additional Stencils.
