PortaDot™ 50-25E

Portable Dot Marking System

Portable, fully programmable dot marking machines for use in all environments where bringing the marking device to the work piece is a prerequisite. Uncompromising build quality and light-weight design ensure the Marktronic™ PortaDot™ 50-25E Portable marking system is suitable for use in virtually any environment.

Applications Include:

- 2D Data Matrix Marking • Component Traceability • Steel Stock Marking • Serial Numbering
- Chassis Marking • Time & Date Marking • Cast & Forge Marking • Batch & Shift Coding
- Programmable Marking • Part Numbering • Component Identification

intelligent marking solutions

TECHNICAL SPECIFICATIONS

Marking Area	50mm x 25mm
Std. Character Sizes	0.15mm - 24.9mm in increments of 0.15mm
Marking Formed	5x7, 7x9, Varidot, HPGL, BMP Logos, True Type Fonts, Data Matrix
Marking Speed	Depends on application
Memory Capacity	LCD: 1350 layouts
Windows	Dependant on hard disk capacity
Weight	Marking head/cable: 2.3kg Controller: 5kg
Electrical Supply	240v 50hz, 110v 60hz
Dimensions	Marking head: 262mm x 210mm x 172mm Controller: 310mm x 339mm x 175mm

Technology

The PortaDot™ (light duty) is a fully programmable dot marking machine easily moved from one application to another around any industrial/commercial site. The well established dot marking technology has been engineered to fit into the most compact programmable marking solution available from Pryor.

Light Weight

Weighing only 2.3 kgs the PortaDot™ ensures operator fatigue is minimized while productivity is maximized.

Portable

The patented aluminum marking head protected in a tough polymer case allows the PortaDot™ to be used in most industrial environments reducing the need to transport heavy items requiring marking to the marking machine.

Highly Flexible

The 50mm by 25mm marking area suits most marking applications from a single programmable system. Variable force control to ensure optimum mark depth for all engineering materials up to 62 Rc (800Hv). The lead-screw driven marking head guarantees dot precision unmatched on other portable systems meaning the PortaDot™ is capable of 2D Data Matrix code marking applications.

Easy to use out of the box

The sturdy design has been created with ease of use in mind. High functionality software ensures operator training is minimized and production efficiency is maximized. The multilingual user interface allows users to choose between different character fonts and type sizes as well as angular and arc marking, serial numbers, date and time marking.

Quiet, Fast, Efficient Marking

Requiring no compressed air supply and powered only by a standard 220 volt (110 volt available) electric source PortaDot™ is both highly efficient, and is significantly quieter than pneumatically actuated systems.

Wide Range of Options

Standard hardware options include Vee plates for marking round components, base and column for bench mounted applications. The standard electric actuation system can be upgraded to a heavy duty option or pneumatic marking if deep marking is required. The Windows software option allows users to control the system through a familiar PC windows interface enhancing networking and data storage capabilities. Extended warranty packages available. Custom design fixturing is available upon request.

When identification is critical for traceability or product impact, a quality mark is required. Monode combines creative engineering with a full range of marking solutions to meet your needs. Over a half-century of progress as a trusted "parts marking problem solver" ...that's Monode!
